Office of Finance

Market Assertion

By 2025, only one-third of finance departments will have achieved a level of technology competence to be described as digitally transformed while the CFOs of those that do will have greater influence in their organization's management.

Office of Finance: Expertise Overview

After a decade of limited technology innovation, significant change is underway. Artificial intelligence, machine learning, bots, RPA, enterprise data management, blockchain distributed ledgers, cloud computing and restructured architecture will transform how the office of finance will work, including accounting, planning and analytics, budgeting and closing.

Office of Finance: Areas of Focus

Business Planning
